

Diamond Select 50/50 Professional Infield Mix

Diamond Select 50/50 Professional Infield Mix is a unique blend of sand, clay, and silt that has been specifically designed for baseball and softball infields across the Western United States. This soil mix will enhance the overall performance of any infield. It is the ultimate soil, customized to meet a professional groundskeeper's expectations, environment and level of play. Screened down to 3/16", this soil offers the professional look and feel that all groundskeepers, coaches, and players require.

Diamond Select 50/50 Professional Infield Mix provides a high quality playing surface to programs looking to increase their field's playability. It is an excellent solution for both wet and dry environments. Once compacted, this material will reduce soil migration, increase recovery, increase soil strength, and play extremely true. Though this blend was designed for Professionals, it is an outstanding playing surface that can be used by all levels.

Diamond Select 50/50 Professional Infield Mix Tips:

Tip #1 The most important aspect of maintaining a professional infield is moisture management. Even though 50/50 is the perfect soil blend, without proper moisture management it cannot play to Major League expectations.

Tip #2 Proper gradation will increase the overall playability of any infield. Even though 50/50 was designed to help soil recovery, good gradation will help your infield shed water rather than expecting your skinned surface to do all the work.

Specifications: 72 pounds per cubic foot (Loose) = 1.03 Yards:1 Ton
84 pounds per cubic foot (Compact) = .88 Yards:1 Ton
2.75 Cubic Yards covers 1000 sq. ft at a depth of 1"

Availability: **Bulk**—5, 10, 15, 24 and 30 Yard Truckloads
Supersacks—2,200 lbs. each, 1 per Pallet

Recommended Application when renovating an infield:

Diamond Select 50/50 Professional Infield Mix should be put down to a depth of 3" - 6" on a standard infield renovation. Once laid evenly, we suggest watering your infield with 1/2 inch of water, rolling it with a 1000 pound roller to achieve proper compaction, and then laser grading it out at 1/2%.

| | Infield | 1" Depth | 3" Depth | 6" Depth |
|----------------------------|----------------|----------|----------|-----------|
| Baseball Coverage | | | | |
| 90' Bases (Grass Infield) | 11,550 sq. ft. | 32 Yards | 96 Yards | 192 Yards |
| 60' Bases (Little League) | 3,850 sq. ft. | 11 Yards | 33 Yards | 66 Yards |
| Softball Coverage | | | | |
| 65' Bases (Slow Pitch) | 9,200 sq. ft. | 25 Yards | 75 Yards | 150 Yards |
| 60' Bases (ASA Fast Pitch) | 8,300 sq. ft. | 23 Yards | 69 Yards | 138 Yards |
